Okon Emmanuel
Frontend Developer

SUMMARY

Well-versed in web and mobile application development with ~ 2 years' experience. Strong expertise in creating responsive UI for various screen resolutions. Proficient with decentralised finance.

EXPERIENCE

FRONTEND DEVELOPER(MOBILE) Feb '22 - Aug '22
Lead Wallet Remote

- Facilitated the implementing and maintaining of a new and improved Swap page and its functionalities. (**React Native, CSS**)

- Implemented the inclusion of 2 blockchain protocols and consumed data from a Backend API to ensure proper functioning of the product (**React Native, Axios, Web3.js**)

- Adapted a new UI and improved User experience by **40%**, reducing **load time** and speeding up the application by 10% (**React Native, CSS)**

- Produced a product that **increased company revenue by 50%**, and fostered partnership with 2 other companies

FRONTEND DEVELOPER (WEB) May '21 - Feb '22
DeSpace Remote

- Designed the dashboard of despace.app from pure HTML and CSS and converted it to a NextJS application, editing the HTML to JSX standard and converting the Jquery code to Next JS compatible Javascript. (**Typescript, HTML, CSS, Next.Js, React.Js, Jquery**)

- Completely built an aggregator across 8 DEXes, including the 1inch v3 and v4 pathfinder oracle api. (**Typescript, Next.Js, React.JS, Node.Js, Axios, web3.js, JSX, CSS, material UI**)

- Built a pricing oracle, fetching from 8 DEXes and smart contracts, to consolidate data, and determine the best price for an exchange, with a 100% chance of getting the best deal every 30 seconds (T**ypescript, Next.Js, React. s, Node.Js, axios, web3.js**)

- Led the **collaboration of a 3 man** frontend development team that analysed and reported to build several products

- Created a now deprecated Lottery app for the decentralised network, implementing a solidity smart contract to achieve this aim. (**TypeScript, Next.JS, React JS, web3.js, css, materialUI**)

FULLSTACK DEVELOPER (WEB) Aug '20 - May '21
School Management Application Remote

- I halfway worked on a student management system, but I had to stop due to insufficient resources, including time.(**Node.js · HTML5 · Express.js · MongoDB · Mongoose ODM · JavaScript · React js · Cascading Style Sheets (CSS)**)
